Thank you.
I will copy and past your text to the email.
I will delete CDFW from the email distribution.

Thanks Judy. I wasn't sure how to edit and save the email in the form (attachment) that you sent me, so I just pasted it here for you to review and paste back in your email. If you don't have any further questions for me, go ahead and send it.

Thanks, John

Ex. 5 Deliberative Process (DP)

Thank you.

Please see the attached draft email.
I just responded to his email to me at the end of October.
I will look at the time line next.

Judy, please draft an email to send Prof Valentine. I can review it if you like, but I think you should send it. Today would be nice.

Also, please review my edits to the attached Chronology. I purposely bolded more significant milestones. Bold or unbold more if you like. I would like to get that to Enrique early afternoon.

I know this is all last minute, so if you need time we can push out your PARS to another day.

Thanks, John

Hi John:

Yes, it would be nice to get the drum locations from Professor Valentine.
I have his email address if you need it.

To figure out if the drums are within the dump site, we need the following information:

1. From Professor Valentine: the latitude and longitude of the drums. It would also be nice to have the locations of the sediment sampling locations.
2. From LA Regional Board: the location of the ocean disposal site. It should be latitude and longitude plus radius.

Judy

Judy, in prep for Enrique's call with Feinstein tomorrow, I think I will look over the chronology so we can provide that to him for background. I'll add a few things and then send you my version to look over.

Also, re: your email below, in my discussion with DOI, we talked about reaching out to the UC professor to see if he would be will to tell us exactly where he located drums, so we could then try to make sense of whether it is in a permitted location. DOI was hoping we would do that. Let me know what you think.

Thanks, John
